

VIVEK SINGH TOMAR

Full Stack Developer

tomarvivek90viv@gmail.com · +91-7415786664 · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience shipping production web apps using React.js, Node.js, Express.js, and MongoDB. Currently leading end-to-end feature development at Galific Solutions. Recently expanded into AI-powered development with LangChain, RAG pipelines, and vector databases. Seeking a Full Stack role at a product-driven company to build at scale.

EXPERIENCE

Galific Solutions — Full Stack Developer (Remote)

Aug 2024 – Present

- Built and shipped 4+ full-stack web applications (including 2 solo end-to-end builds) using React.js, Node.js, Express.js, and MongoDB — serving both internal teams and 100+ external users.
- Migrated the company's main website from Next.js to Astro, improving Lighthouse SEO score from 70 to 92 (~30% gain) through static-site generation, optimized meta tags, and structured data.
- Led end-to-end feature development — from requirement analysis and UI prototyping through API design, integration testing, and deployment via Netlify.
- Architected RESTful APIs with proper error handling, input validation, and JWT authentication middleware across multiple client projects.

Density Exchange — Jr. Frontend Developer

Sep 2023 – Mar 2024

- Built the bank account linking feature (admin + user-facing) for a crypto trading platform using TypeScript — enabling users to securely connect bank accounts for fiat transactions.
- Developed and integrated frontend UI components across web and mobile platforms in a 10+ member engineering team.
- Resolved production bugs across the existing codebase, improving platform stability and trading experience for active users.

KEY PROJECTS

AI PDF Chat | LangChain · Gemini API · MongoDB Atlas Vector Search · React.js

2026

[GitHub](#) · [Live Demo](#)

- Built a full-stack multi-user RAG chatbot — users upload PDFs, and the system provides accurate, citation-backed answers using semantic search.
- Engineered a LangChain-based RAG pipeline with Gemini Embeddings and MongoDB Atlas Vector Search for efficient document retrieval across large document sets.
- Implemented JWT-based authentication with user-level data isolation — each user's documents and chat history are completely sandboxed.
- Designed the React.js frontend with AI reasoning logs, page-level source citations, and local API key support for flexible deployment.

Tech-Buddy | React.js · Node.js · Express.js · MongoDB · Groq AI · Gemini API

2026

[GitHub](#) · [Live Demo](#)

- Built an AI-powered mock interview platform with real-time adaptive questioning, live coding rounds (Monaco Editor), and voice input support.
- Integrated Groq AI and Google Gemini APIs to dynamically generate interview questions, evaluate code submissions, and produce detailed performance reports.
- Implemented interview analytics dashboard with performance tracking, scoring breakdowns, and historical comparison across sessions.

TECHNICAL SKILLS

- Frontend:** React.js, Next.js, Astro, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3
- Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication
- Database:** MongoDB, MongoDB Atlas, Vector Databases
- AI / ML Tools:** LangChain, RAG Pipelines, Gemini API, Groq AI, Embeddings
- DevOps & Tools:** Git, GitHub, Netlify, Vercel, Render, Postman, VS Code

EDUCATION

Masai School — Full Stack Web Development

Aug 2022 – Jun 2023

Vikram University — Bachelor of Computer Applications (BCA)

2014 – 2017
